

Eye Tech News

A publication of the Detroit Institute of Ophthalmology

VOLUME 17, ISSUE 2

JUNE 2003

The Eye and The Auto World Congress

Plan to attend this three-day forum designed to better understand and explore ways to meet the visual needs of the motorist. Some of the topics are listed below.

June 19 - Operator Factors

- Harm From Traffic Crashes - A Major World Problem
- Vision, Attention and Drivers' Task Control
- Cataract Surgery and Driver Safety
- Driving with Homonymous Hemianopia

June 20 - Vehicle Factors

- The Blind Spot Problem and Technological Approaches to Its Solution
- The Use of Stereo

Cameras in Accident Avoidance

- Are In-Vehicle Intelligent Transportation Systems Legible and Non-Distracting?

June 21 - Environmental Factors

- Pedestrians and Drivers with Visual Impairments: Research, Design and Universal Access
- Driver Distraction and Traffic Crashes
- Headlamp Glare and Driver Vision: More Than Meets The Eye
- Night Vision Systems
- Aids for Driving With Low Vision

Register on-line at www.acteva.com/go/eyeson for a total 19 Category I physician credits. COMT's may use these credits on a 1:1

basis. COA's and COT's earn credits on a 2:1 basis when a course is not JCAHPO-approved. For more information, visit www.eyeson.org and click on *The Eye and The Auto* under Research.

EYES ON DESIGN

The *Eyes on Design* auto show will be held at the General Motors Technical Center in Warren, Michigan on Sunday, June 22, 2003. Tickets cost \$15.00 per person at the gate. Events leading up to the car show include: *Eve of the Eyes* on Friday, June 20 (tickets are \$25.00 per person, \$15.00 for students); *Vision Honored* (SOLD OUT); *Night Vision* - an entertainment gala featuring Peter Cincotti on Saturday, June 21, 8:30 pm - 11 pm (tickets \$100.00); *Private Eyes* brunch on Sunday, June 22 (tickets \$100.00 per person by reservation only).

Jobs and Salary Information

Classes are in session for the spring/summer term. Prospective employers should continue to fax your job postings to (313) 822-4233 and they'll be immediately added to our bulletin board. Thanks to our paid advertisers, this newsletter is delivered free to over 2,600 addresses in MI, OH, IN. Paid ads are also placed

on our web site, so don't forget to tell your associates to check out www.eyeson.org for the latest job and course information.

The *National Salary and Benefits Report for OMP* was completed in July 2002 and is available on line at www.atpo.org. National and regional data are available based

on numerous factors, including employment status, practice size and setting, size of town, years of experience, and other employment characteristics.

To order a copy contact ATPOmembership@jcahpo.org. The cost for non-members is \$40.00 a copy.

Ophthalmic Assistant Program

DIO's Ophthalmic Assistant Program is approved to meet the educational requirement for JCAHPO certification. The entire program consists of three college-level courses that meet once a week for 15 weeks each. The courses are:

1. Ophthalmic Assistant Theory I
2. Ophthalmic Assistant Theory II
3. Ophthalmic Assistant Skills

Most students also work full time during the day and take one course per term to complete the program in three terms. If you start the program in August you would finish the following July. Some

students finish within two terms by doubling up for one term. This means they sign up for a theory course and the skills course in the same term and attend classes two nights per week for that term.

This is a niche market field. While skilled workers are in high demand, the career field is relatively unknown. You won't find multiple sections of DIO's classes, as you might for English 101 at your community college. This means you can only take OA Theory

The entire program consists of three college-level courses.

I in the fall term, and OA Theory II in the winter term. If you don't register in time, you might wait another year for the same class to be repeated.

We encourage everyone to contact DIO early, make arrangements to take our entrance examination, and get your application processed at least a month before you wish to register.

The next term starts in August. Apply NOW !!

Entrance Exam Required

The Health Occupations Basic Entrance Test (HOBET) is required for admission to many allied health programs across the country. Most state education departments mandate that a school prove an applicant's "ability to benefit" from their training program. Passing scores on the HOBET are one indication that an individual has the background to handle the reading assignments and mathematical computations required of the profession. The HOBET also identifies how an

individual approaches study in general, and identifies which learning approach is most effective for that individual. The diagnostic report generated by the

HOBET can alert DIO to an individual's special needs so that assistance can be given

before the student experiences problems that may tarnish one's academic record. Since the DIO is not on a college campus, we usually recommend contacting learning centers on a community college campus near the student's home for math or reading comprehension assistance.

Appointments to take the HOBET may be scheduled between 9:00 AM and 2:00 PM with Carolyn Mulford. Allow 2 1/2 hours to take the test when you arrive. A study guide is also available for \$29.15 (tax incl.). Prepare now!!

*Call Carolyn Mulford at
(313) 824-4710, ext. 224 to
schedule an appointment.*

So, What's On the HOBET?

The HOBET "passing" score is based on a measure of reading comprehension and math skills.

Reading comprehension skills are evaluated at the inferential level of understanding. This means you will be asked to draw conclusions from facts and statements within a paragraph. You will also be asked to predict outcomes. If your reading comprehension score is below average, you will be given a reading level designation of Frustration. This means that even with the benefit of

lectures, you would experience more than average difficulty in critically reading college level material. There are average and above average scores as well.

The math section will begin with addition, subtraction, multiplication, and division of whole numbers. It will then require you to do the same for common fractions, decimals, percentages, and basic algebra. You will need to know how to calculate problems with positive and negative integers.

The learning style section is not used to calculate a "pass/fail" score, but helps identify your best study approaches.

Get on board and join an exciting career in eye care!

OTP 100: Ophthalmic Assistant Theory I, Aug. 26 - Dec. 9

CREDIT HOURS = 3

PREREQUISITE:

Admission to Ophthalmic Assistant Program. This class is part of an approved program for the Ophthalmic Assistant certification. Call DIO for complete program information and application.

DESCRIPTION:

This is the first course in the Ophthalmic Assistant Program sequence. The course will emphasize career opportunities for ophthalmic medical personnel; basic ocular anatomy and physiology; written and oral communication systems in health care; optical calculations;

OSHA standards and aseptic technique; basic examination skills; instruments in the ophthalmology clinic; and how to properly collect and record data in the medical record using common terms and abbreviations.

TEXTBOOKS

Students should budget approximately \$150.00 for books. They include

- Chabner, *The Language of Medicine*, 6th Edition, W.B. Saunders Co, 2001.

- Ledford, *The Little Eye Book*, Slack, Inc., 2002.
- Stein/Slatt/Stein, *The Ophthalmic Assistant, Fundamentals and Clinical Practice*, 7th edition, C.V. Mosby Co, 2000.

Learn how to document test data in OTP 102!

Recommended:

- Cassin, *Dictionary of Eye Terminology*, 4th Ed., Triad Publishing Co, 2001.

OTP 102: Ophthalmic Assistant Skills, Aug. 28 - Dec. 11

CREDIT HOURS = 3

PREREQUISITE:

Admission to Ophthalmic Assistant Program. This class is part of an approved program for the Ophthalmic Assistant certification. Call DIO for complete program information and application.

DESCRIPTION:

Through laboratory demonstration and practice students will be introduced to those skills that must be mastered through clinical practicum or on-the-job experience. The aim of this 12-week session is to familiarize entry-level students with a protocol for using ophthalmic equipment. The course grade is based on attendance, weekly written quizzes, a mid-term, and a final exami-

nation.

Restricted to 10 students.

SKILLS COVERED

Visual acuity measurement, Manual Lensometry, Biomicroscopy, Applanation Tonometry, Manual Keratometry, Perimetry, Ocular Motility, Retinoscopy, Refractometry

Intensive Training Seminars: COT Preparation

PREREQUISITES:

Currently certified as a COA and working under ophthalmological supervision as a COA.

DESCRIPTION:

According to the JCAHPO/ATPO President's Report 2002, 68% of all certified personnel are at the COA level. That number drops to 28% for COT and a mere 4% for COMT credentials. That's out of a total 14,424 certified personnel.

The DIO's Technician/Technologist program is currently inactive. In order to assist local COA's in furthering their skills, the DIO will offer a series of monthly lectures on topics relevant to the JCAHPO certification examination for COT's. This series will be submitted to JCAHPO for continuing education credit approval of 2 credits per lecture. Up to 18 credits may be approved, which is the required amount necessary to apply for the COT examination. Cost = \$50.00 per lecture or \$250.00 for the entire fall series. A text will be recommended.

FALL SCHEDULE

Wednesday evenings, 6:30-8:30 PM

- August 27 - Perimetry Concepts
- September 24 - Perimetry Techniques
- October 22 - Geometric Optics
- November 12 - Physiological Optics
- December 10 - Refractometry

Break until January 21
